

# flexible modularity long lasting utility

The **Collamat**® new product range covers a product programme perfectly suited for integration into a marking and labelling solution. The products are specialised for industries like pharma, food & beverages, personal care, and household chemistry. The **Collamat**® modular labelling systems and print & apply solutions are made to match the customer needs for integrated labelling and marking solutions in the production.

# reliability, speed, precision

**Collamat®** is a world market leader in supplying of standardised modules for labelling and marking solutions. The products are defined by an excellent design, optimal functionality, flexibility, and high quality. Compatibility and easy integration with other systems is another major advantage of any **Collamat®** module.

The **Collamat®** product range consists of 6 models of traditional label applicators, the **Collamat® 2610, 3600, 6600, 7600, 8600, and 9100**. They are characterised by a compact well-designed construction that is extremely versatile and requires minimal space. **Collamat® 9100** is also available as a high speed labeller running up to 250 m/min, this version is the **Collamat® 9100 i**.

A new label applicator is the **Collamat® 8000 Cross Web**. It is a cross web labeller that fits on the top of most thermo forming machines. The **Collamat® 8000 Cross Web** applicator is also available with a thermal transfer print module to print barcode, date, etc.

Within the print & apply systems the **Collamat® Etiprint** line covers two types of traditional solutions; **Collamat® Print & Apply** with last label printed and applied, and **Collamat® Inline Printing** for maximum application speed in a print & apply solution.

A new but already proven alternative is the pat. pend. **Collamat® Linerfree Systems** designed to optimise carton labelling by eliminating waste and reducing handlings and production breaks.

**Collamat® Verifier** is another new product. It is introduced to meet the increasing demand for quality barcodes and documentation of this. It can be coupled with **Collamat® Network** to save data for statistics. The Network option can also link all the applicators, thereby obtaining a high level of data security.

Finally, product handling is taken care of by the **Collamat® Flexoline**. Consisting of small independent units like top conveyor, wrap around unit etc. **Collamat® Flexoline** takes care of placing and positioning the products before the label is applied.

**Collamat®** enlarges the product programme further within 2006 and 2007, so please keep an eye on [www.collamat.ch](http://www.collamat.ch) to be updated about the latest novelties within labelling. Please also visit our homepage to find further information about the products and to download product sheets or cases.

## Label applicators:

Collamat® 2610  
 Collamat® 3600  
 Collamat® 6600  
 Collamat® 7600  
 Collamat® 8600  
 Collamat® 9100  
 Collamat® 9100 i (high speed)

## Print & apply:

Collamat® Etiprint Print & Apply  
 Collamat® Etiprint Inline

## Cross web labelling:

Collamat® 8000 Cross Web

## Carton labelling:

Collamat® Linerfree Systems:  
 - Collamat® Linerfree Labeller  
 - Collamat® Linerfree Paper

## THE NEW PRODUCTS:

### Collamat® Linerfree Systems

A cost saving labelling technology that protects the environment by eliminating tons of liner waste. A pat. pend. system consisting of **Collamat® Linerfree Labeller** and **Collamat® Linerfree Paper**. Having 60% more volume on the roll diameter compared with traditional labels, and utilising the same roll for any label length or layout, the production time is optimised effectively.

### Collamat® 8000 Cross Web

A label dispenser and vacuum chamber which is mounted on top of a thermo forming machine. It applies a row of labels at a time thus increasing productivity and combining packaging and labelling in one operation. Can be delivered with a printer module (print & apply).

### Collamat® Network

Based on the flexible Ethernet system you can increase flexibility and assurance with **Collamat® Network**. All lines get access to all label layouts and data and the units belonging to the individual line are linked very closely.

### Collamat® Verifier

If you want documentation and verification of the quality of the barcodes, you can opt to have **Collamat® Verifier** installed as an integrated part of your labelling system. Performs continuous quality control and complies with a preset ANSI quality, e.g. A and B.

#### Product handling modules:

Collamat® Flexline Alignment Unit  
 Collamat® Flexline Top-Conveyor  
 Collamat® Flexline Side-Conveyor

#### Software:

Collamat® Network

#### Verification of barcodes:

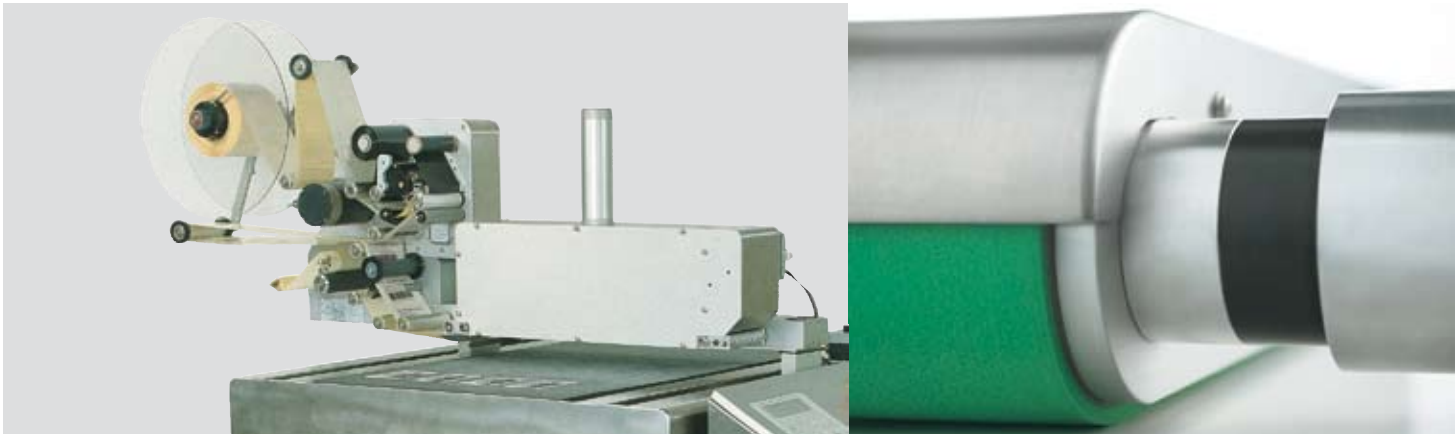

Collamat® Verifier

#### Complete customised solutions:

Made on request:

- Food & beverages  
 - Electronics  
 - Cosmetics  
 - Pharmaceuticals  
 - Logistics  
 and others

# reach for the stars...

With **HM Group** as your partner you are guaranteed long-term reliability. **HM Group** comprises the Danish company **HM Labelling A/S** and the Swiss **HM Collamat AG**. **HM Group** is an innovative customer oriented company which develops, manufactures, services, and markets a complete product programme and customer specific system solutions within labelling to the global market. **Collamat®** is specialist in the modular construction and sells to the world market through value adding distributors under the motto „Simplicity is prerequisite for reliability“.
